

MAHEK SURESH MANANI

DATA ANALYST | BUSINESS ANALYST | SUPPLY CHAIN ANALYST

Chicago, IL (Open to Relocate) | maheksmanani@gmail.com | +1 (773)690-0311 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Data Analyst and Business Analyst with 3+ years of experience delivering a 40% cost reduction, 97.4% forecast accuracy, and a 34% incident rate reduction across IT consulting, digitalized manufacturing, and supply chain engagements. Holds a STEM-designated MS in Business Analytics (GPA 3.875, DePaul University). Proficient in SQL, Python, R, Power BI (DAX), and Tableau, with a strong track record in KPI development, MIS reporting, ETL pipelines, predictive modeling, variance analysis, and translating complex datasets into actionable insights for cross-functional and senior stakeholders.

EDUCATION

MS in Business Analytics (STEM) GPA: 3.875 / 4.0	Mar 2026
<i>Kellstadt Graduate School of Business, DePaul University - Chicago, IL, USA</i>	
Advanced Certificate in Business & Data Analytics	Dec 2024
<i>Indian Institute of Management (IIM) - Udaipur, India</i>	
B.Tech. in Production Engineering	May 2024
<i>Veermata Jijabai Technological Institute (VJTI) - Mumbai, India (NAAC GRADE A++)</i>	

SKILLS

Domain Expertise: Supply Chain Analytics, Inventory Optimization, Procurement Analytics, Demand Planning, Process Optimization
Data Analysis & BI: Data Analysis, Business Analysis, MIS Reporting, Ad-Hoc Reporting, KPI Tracking, Variance Analysis, Trend Analysis, Root Cause Analysis, Performance Analysis, Data Storytelling, Power BI, DAX, Tableau, Excel Dashboards, Reporting Automation, Interactive Dashboard Development
Programming & Database: SQL (CTEs, Window Functions, Joins, Query Optimization), Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, Excel (PivotTables, XLOOKUP, Power Query, Advanced Formulas)
Statistics & Modeling: Statistical Modeling, Predictive Analytics, Forecasting, Regression, Segmentation & Time-Series Analysis, A/B Testing, Forecast Accuracy Analysis
Data Management: ETL Pipelines, Data Cleaning, Data Validation, Data Quality, Data Governance, Data Warehousing, Database Management
Business & Stakeholder Skills: Requirements Gathering, Stakeholder Communication, Cross-Functional Collaboration, Data-Driven Decision Making, Presentation to Leadership, Project Coordination, Microsoft Power Platform, SAP, GitHub, JIRA, Agile/Scrum, Google Analytics, Microsoft Excel, PowerPoint

EXPERIENCE

Technetics IT Services Associate Analyst	Mar 2023 - Nov 2024
- Owned end-to-end data and business analysis across 4-5 client engagements using SQL and Python, delivering weekly and monthly MIS reports and ad-hoc analysis that informed operational and strategic decisions for client leadership teams. - Built and maintained 3-5 client-facing Power BI dashboards tracking real-time KPIs across logistics, FMCG, and FinTech verticals, working in a team of 2-3 analysts to ensure accuracy and on-time delivery. - Engineered Python ETL pipelines using Pandas and NumPy to extract, clean, and standardize multi-source datasets into analysis-ready formats, cutting manual data preparation time and improving downstream reporting quality. - Conducted customer segmentation and demand forecasting analysis using Scikit-learn and regression models, presenting findings directly to client stakeholders and through internal leads depending on engagement scope.	
Siemens Ltd. Intern	Jul 2022 - Dec 2022
- Queried 3+ years of component procurement data using advanced SQL across 50+ supplier contracts for SIRIUS-range switchgear production, enabling a spend benchmarking and variance analysis framework that contributed to a 40% cost reduction. - Designed 5 automated Power BI dashboards with DAX measures tracking supplier lead time, delivery reliability, and spend variance across the digitalized production line, eliminating 8+ hrs/week of manual MIS reporting for plant management. - Performed root cause analysis on 200+ delivery failures using the DMAIC framework, identified 3 systemic supplier issues, and presented findings to cross-functional teams improving on-time component delivery by 12% within 60 days. - Built regression-based demand forecasting models for critical electrical components, improving material planning accuracy by 15% and reducing excess inventory by 10%.	
VJTI Student Assistant, Supply Chain and Operations	Jun 2021 - Feb 2022
- Mapped and analyzed 12 months of warehouse throughput data across 4 facility zones using SQL and Excel, traced a 23% throughput loss to 2 specific material flow bottlenecks, and proposed targeted process redesigns that were incorporated into operational planning. - Documented and standardized 15+ end-to-end workflows across receiving, storage, and dispatch using time-and-motion study methodology, reducing process ambiguity and cross-team handoff errors. - Packaged analytical findings into 7 structured performance reports with trend analysis and root cause summaries, formally presented at shareholder review meetings and adopted by operations managers for strategic planning.	

PROJECTS

Fleet & Operational Risk Analytics - Reyes Holdings	
- Applied RFM-style driver segmentation in R across 4+ integrated data sources, revealing that 21% of drivers generated 58.8% of total incident risk and enabling targeted interventions that reduced incident rates by 34%. - Built executive BI dashboards tracking 12 live KPIs with 91.4% model classification accuracy, replacing lagging static reports with real-time fleet risk visibility for leadership.	
Demand Forecasting & Inventory Optimization	
- Engineered 3 regression models in Python across 24 months x 80+ SKUs, iterating on MAE and RMSE until the best model reached 97.4% forecast accuracy — a 15% improvement over the existing baseline. - Translated forecast outputs into EOQ, safety stock, and reorder-point logic, reducing projected stockouts by 18% and excess inventory by 20% across the supply network.	
Procurement Cost Optimization - SQL Analysis	
- Wrote advanced SQL using CTEs, window functions, and multi-table joins to benchmark 30 vendors across \$4.7M+ in transactions, uncovering 12% in cost-reduction opportunities and flagging 4 underperforming contracts. - Built spend-analysis reporting frameworks giving procurement teams ongoing visibility into vendor performance and variance trends, supporting strategic sourcing decisions beyond a one-time snapshot.
